

## Dear 2<sup>nd</sup> Grade Social Studies Teacher:

On February 4, 2021 the North Carolina State Board of Education approved new content standards for K-12 social studies. The elementary standards define what students are expected to know, understand, and be able to do by the end of each grade. Included as a part of the approval of the standards is a [preamble](#) written by NC Superintendent of Public Instruction, Catherine Truitt. The [preamble](#) states that the standards are a framework intended to teach the full spectrum of history to best help students learn and use the information they acquire in the course of learning experiences.

### Need to Know:

- Social Studies is taught daily in a minimum 30 to 45 minute blocks with a conceptual teaching approach.
- The standards and objectives in the second grade SCOS, **America: Our Nation** support the building of the foundation of social studies skills, concepts, and processes that progress vertically K-12 and prepare students to be college, career, and civic ready.
- Students will explore the content through the following lenses: **inquiry;**
- **behavioral sciences; civics and government; economics; geography; and history.** As students develop cognitively, these lenses become more focused based on the grade-level content and disciplinary thinking skills.
- Study the explanation and example of the graphic (Figure 1) to begin developing your understanding of concept-based teaching.
- Lessons should be developed *with an integrated literacy approach.*
- Lessons should engage students' intellect and interest in conceptual understandings: *1. about real people's lives and their relationship to each other and to nature; 2. various roles students will assume in making society more equal and more just; 3. and expressing of students' ideas powerfully to make a difference in society locally, nationally and internationally.*
- Use the new 2021 Social Studies Unpacking Guide to craft the learning.

**The Inquiry Strand** is a content-neutral strand that focuses on the skills necessary for students to improve their critical thinking. The Inquiry Strand comes first in the standards document because the skills outlined can and should be applied within all content in the course. The content strands are arranged alphabetically, and each represents a different social studies lens through which students should access the content. **The Inquiry Indicators** are meant to be used in concert with the content standards. The intent is that by the end of grade 2 students will have been exposed to the skills essential to developing critical thinking in social studies. For this to occur, students must be exposed to inquiry indicators in each grade. [Link: What is inquiry-based learning? \(video\)](#).
